Washington, DC 20460

From: Kent Hovind #06452-017

FPC Box 9000

Berlin, NH 03570

Dear FOIA officer,

Please send me information about the toxic limits that are allowed in public water supplies for: Aluminum or Aluminum Oxides; Barium; Strontium and Floride.

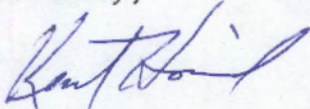

Please also send me information on who to contact or what procedure to follow if it is shown that the local water supply exceeds the toxic limit.

Please send any additional information that may be helpful to a high school science class doing studies on the topic of safe drinking water and the effects these items can have if consumed in excess or for long time frames.

If there are any costs involved to have this information send to me please let me know.

Thank you for your prompt attention to this matter.

Sincerely,

Kent Hovind
